Sub: Facility Expansion and New Production Capabilities

Dear Sir,

Veerhealth Care Limited is excited to announce the purchase of 27,451 Sq. Ft. of additional land adjacent to its Vapi, Gujarat facility. This expansion will enable the company to set up new manufacturing and filling lines to meet growing export & local demands of company's product and integrate plastic blow molding and injection capabilities.

The new facility will enhance Veerhealth Care Limited's production capacity, support a revenue target of ₹ 100 crores in 2-3 years with a PAT Margin of 10%, and provide a comprehensive solution for client needs.

Please find enclosed herewith details giving information about the same.

We request you to kindly take the same on record.

Thanking You.

Your truly,
For Veerhealth Care limited

Veerhealth Care Limited Expands Gujarat Facility to Scale Up Production and Meet Rising US Demand

Veerhealth Care Limited is thrilled to announce its expansion plans, which involve acquiring an additional 27,451 sq. ft. of land adjacent to its current manufacturing facility in Vapi, Gujarat. This acquisition will enable the establishment of new manufacturing lines which will be as per CGMP norms as required by US FDA to meet the increasing demand from the US market.

Following the expansion, the total plot area will be 58,623 sq. ft., combining the existing 31,172 sq. ft. with the newly acquired 27,451 sq. ft. The total constructed area will rise to 90,000 sq. ft., with 60,000 sq. ft. from the current facility and 30,000 sq. ft. from the new construction.

The company expects a **substantial increase in demand &** positive feedback from the US, East & North African market after the initial supply of oral care products. To address this anticipated demand, Veerhealth Care Limited will **introduce high-capacity manufacturing and filling lines** in the new facility.

The new facility will be additionally equipped with plastic blow molding and injection molding machines, allowing for backward integration by producing packing materials internally. This strategic move aims to provide a comprehensive solution to client requirements and is projected to help Veerhealth Care Limited achieve a revenue target of ₹100 crores over the next 2 to 3 years with a 10% PAT Margin. All manufacturing stages of the company's products will be completed within its own facilities.
